

Cincinnati State Bethesda School of Nursing – End-of-Program Student Learning Outcomes

- **Patient-Centered Care:** Students will apply knowledge related to physical, psychological, spiritual, and cultural needs, preferences, and values to the care of a diverse population of patients.
- **Clinical Reasoning:** Utilize critical thinking and clinical reasoning skills to facilitate sound decision-making.
- **Collaboration:** Apply leadership principles that facilitate interdisciplinary collaboration and teamwork.
- **Professional Behavior:** Examine own attitudes and behaviors to promote professional values of the nursing discipline and improve the quality and safety of their healthcare system.
- **Caring:** Create a healing environment that demonstrates caring and respect for the values, preferences, cultural beliefs, and healthcare needs of all individuals.
- **Evidence-based Practice:** Design, implement, and evaluate a plan of care based on best practices and institutional policies.
- **Information Technology:** Utilize health information technology to enhance communication, manage knowledge, minimize error, and support decision-making.
- **Safety:** Promote a safe environment for patients by minimizing risk factors and recognizing and meeting patient priority needs.
